

Subject scaling, depth-22 — one pool and one epoch at every S
2156-recording pool, step-matched (4400 steps), fixed epoch 325, test split (R6)

- S subjects drawn from the 2156-recording pool (R1-R5, R7-R10)
- shaded band = mean $\pm$ 1 sd over nested draws (3 unless labelled)
- hollow = whole pool, n=1 draw (no spread measurable)
